

Evolution™ 500 Series Dishwasher SHE53L0

BOSCH
Invented for life

Can a dishwasher make your house a **better** place to live?

Absolutely, if it's a Bosch. Bosch dishwashers are the only ones to offer unique combination of nearly silent operation, powerful features that leave dishes sparkling, intelligent functions that work around your lifestyle and an efficient operation that saves both water and electricity. All wrapped in a contemporary design that's as beautiful as it is functional.

Class-leading Quietness

Bosch dishwashers are the quietest. With a suspended two-pump motor system, vibrations and noise are drastically reduced. And with heavy-duty bitumen, coated metal and cotton fiber sheet insulation, the noise is basically buried.

ENERGY STAR® Qualified and NSF Certified

Proving once again that Bosch is committed to efficiency, all of our dishwashers already exceed the 2007 ENERGY STAR® requirements. They also boast NSF certification for 9 out of 12 wash cycles, ensuring your dishes are 99.99% bacteria-free at the end of each cycle.

SENSOTRONIC®

An advanced scanning eye examines the level of soil in the wash water and automatically deletes a secondary fresh-water fill if not needed, saving you time and money while cutting energy usage by 20%.

AQUASTOP™

Leaks are contained before they ever touch the floor with this Bosch exclusive. It monitors the level of water in the base of the machine and automatically shuts down operation in the highly unlikely event of a leak.
