

Main Features & USPs

FreeFlow Cool Air System™

Technical Information:

First the electronic controls and sensors keep temperature consistent within 1.5 degrees, and direct the cold air throughout the entire cavity by the multi-flow air tower. Then the air is directed through the industry exclusive cool door, so that the items in the door bins are as cold as the items on the shelves.

Customer Benefit:

Ability to keep certain foods fresher, longer.

Luminous Light System™

Technical Information:

System utilizes halogen light towers and halogen spotlights that fully illuminate the interior space.

Customer Benefits:

There is better, more even light distribution throughout the entire refrigeration cavity and food items are more visible on lower shelves.

Liberty Shelf™

Technical Information:

Allows the touch-button adjustment of a fully loaded shelf up to 22lbs.

Customer Benefits:

Provides increased versatility and the liberty to maximize the interior space quickly and easily. In addition, the customer does not have to unload the shelf to adjust its height and there is ample room for taller items.

Freedom Hinge™

Technical Information:

Holds up to 220lbs of door weight;
door opening angle: 90° to 115°.

Customer Benefits:

Allows full access to the full extension drawers of the Freedom Collection and supports virtually any custom panel—including even some stone and marble exteriors.

Freeflow Ice System™

Technical Information:

Ice in the ice bin is agitated at timed intervals so that consumers will have complete access to all available ice upon demand.

Customer Benefits:

Consumers will have complete access to all available ice upon demand, and ice from the dispenser will be immediate and consistent.

Additional Features & Benefits:

- Each Freedom Collection's unique column features its **own evaporator and compressor** while maintaining optimal humidity levels.
- **Quietness:** Each Freedom Column is amongst the quietest on the market (39 – 40 Decibels).
- **Carbon Air Filter** works to eliminate the transfer of food odors within the refrigeration cavity.
- **Filter Change:** This function will advise the customer when it is necessary to change the water filter.

Additional Features & Benefits (cont'd):

- **Sabbath Mode:** By activating this holiday mode the consumer does not have to worry about lights, sounds, alarms, fans or compressors being activated when the door is opened or closed.
- **Economic Mode:** Regulates the temperature to the highest temperature setting.
- **Vacation Mode:** Regulates the temperature to the highest temperature setting and will disable all interior lights as well as the ice maker.
